

## Allen Dulles Was Friendly To Hitler, Says Vishinsky

UNITED NATIONS, N. Y., Dec. 2. — Soviet delegate Andrei Y. Vishinsky today accused Allen Dulles and chief of the Central Intelligence Agency, being friendly with Adolph Hitler.

Vishinsky made the charge while replying in the General Assembly to a speech in which U. S. Ambassador Henry Cabot Lodge, Jr., ridiculed Soviet assertions that "it was the United States that started Hitler."

"If he can persuade the people of the world that the late President

Franklin D. Roosevelt collaborated with Hitler," Lodge said, "he will be far cleverer than the man who sold refrigerators to the Eskimos."

Replying, Vishinsky said:

"Mr. Lodge even reproached me for having accused the late President Roosevelt of being friends with Hitler. I never could, for that would not be in line with reality and against the trend of American foreign policy at the time.

"But I can make such charges against other ruling circles of the U. S. at the time, who were closely related to various persons—such as Allen Dulles and various monopolies."

Vishinsky also quoted former President Truman's remark that the U. S. should help the Germans if the Russians were winning and help the Russians if the Germans were winning, in order to let them kill each other.

GETTING the dope on the Soviet atomic program is just one aspect of the fact-gathering. Here are others: Russia has an army of about 4,600,000. Its tractor production is up 40 per cent since 1940. It has an annual plane output of 22,000 in 85 plants. The Soviet navy has 300 submarines.
